

Simplified SharePoint® Document Management

Paper is a vital part of every business. How does your organization deal with growing piles of paper that need to be filed, securely stored, and later recalled? Dynamic Filer allows users to quickly file and find any paper or electronic document with a single click directly from a desktop or business application. Documents become available to anyone in your organization, anywhere, at any time—it's that simple.

Cost-effective filing and finding for business users

Businesses quickly reap the benefits of effective document management with Dynamic Filer through easy installation, one-touch features, enhanced search capabilities, and quick retrieval. Contracts, bills of lading, shipping receipts, and other documents will no longer contribute to the ever-growing stacks of paper around your office.

How it works:

-  1. Index a document with a single click within any business application or your desktop.
-  2. Place assigned barcode label on corresponding document.
-  3. Scan document anytime from any scanner.
-  4. Document is automatically indexed and stored in SharePoint.
-  5. Documents are available for easy retrieval with a single click.

Dynamic Filer

allows users to easily file and search for SharePoint documents with a single click from any desktop or business screen.

SharePoint-based and flexible

Built on SharePoint, Dynamic Filer features an easy-to-understand point-and-click user interface designed for office workers rather than IT professionals. Since Dynamic Filer doesn't require any programming or plug-ins, business users can configure the solution in minutes, allowing rapid integration across functional business units.

Works with any device that can scan to a file directory including fax servers, copiers, desktop and network scanners, as well as FTP servers

Compatible with all Microsoft Dynamics solutions and almost any other business application

Works with electronic documents; no need to print and scan your documents to use Dynamic Filer

Seamless integration, extendable to every desktop

Dynamic Filer's web-based delivery allows for every user in your organization to have access to the documents they need, when and where they need them. Seamless integration with SharePoint and other business applications help expedite the index and search processes.

Scalable to any size organization, Dynamic Filer effectively streamlines everyday business processes. Plus, with automatic indexing, the solution helps eliminate lost and misfiled documents, and ensures document security by controlling and recording use. Key features that make Dynamic Filer an integrated and efficiency-driving part of an organization include:

One-click index and search from any business screen or even the Windows desktop

Industry standard barcodes for cost-efficiency and compatibility

Pair with Kodak Capture Pro for Dynamic Filer for a complete capture solution

Dynamic Filer is a complete file and find solution for SharePoint. When companies have larger volumes of paper documents to be imaged, Kodak Capture Pro for Dynamic Filer offers robust and efficient batch scanning. The automated import solution provides the perfect complement to our transactional solution. Key features include:

Automated indexing efficiencies, networkability, and database integration

Compatibility with nearly any scanner

Ability to import previously scanned documents

Automated indexing including barcode recognition, OCR, database-assisted lookups, and validation

Numerous field validation and editing controls, including masks and regular expressions

The Kodak logo, consisting of the word "Kodak" in a bold, black, sans-serif font, centered between two horizontal black bars.
